HOW TO RECEIVE
THE MOST BENEFIT FROM YOUR TUTORING SESSION

• Prior to the tutor session, do all the reading and attempt all assignments. Come prepared with questions about areas you are having problems with.

• Talk to your professor about how you can improve your understanding and grades. Let him or her know that you are seeking a tutor.

• Explain to your tutor what topics you are having difficulty with. It is especially helpful if you can do this prior to the tutoring session so that the tutor can prepare.

• Have a positive attitude—try to learn as much as possible during the tutoring session.

• Ask your tutor to explain difficult concepts, and to give examples of how to solve problems, but do the actual required work yourself.

• Take notes during the tutoring.

• Observe how the tutor approaches the subject matter. Seek out study tips for the material from the tutor.

• After the tutoring session, review the material covered and practice working the problems.
