These professional development sessions are offered for the enhancement of office productivity and general technology skills. Enrollment is open to Furman faculty and staff at no cost to participant departments.

Classes are held in the Professional Development Lab, lower level library, room 042 (unless otherwise noted). Class size is limited and varies depending upon the topic.

What classes are offered and how do I sign up?

**Scheduled sessions** are listed with the session date and time included with the course information. Identify a class you want to take and reserve a seat by emailing Jean Childress.

**On-demand sessions** are scheduled upon request. Telephone or email Jean Childress and she will work to schedule the class at a convenient time for you.

**Customized sessions** are offered for departments upon request too. If you have technology instruction needs that are not addressed by the sessions in this catalog, email Jean. She will work to structure training that fits your particular need.

**Hump Day Training** is a recurring professional development lab reservation. Wednesday afternoons are reserved so that faculty and staff have a space where they can participate in self-directed training using on-line tutorials from Lynda.com, or group training with or without a facilitator.

Email Jean Childress if you are interested in using the space. She will help you to arrange staff to assist if needed.

• Twitter
• Where Do I Put It and How Do I Share It
• Zoom
Scheduled Sessions

Box Opened Up with Michael Vick
1:00 – 2:00, Oct 31

Target Audience:  All campus users new to Box or new to cloud storage will benefit from this class.

Session Objective:  Box is the cloud storage service Furman licenses for faculty, staff and student use.  In this short session, Michael will demonstrate how to sync local files, drag and drop usage, sharing documents, and security best practices.

InDesign with Michael Vick
10:00 - 11:30, Oct 18

Target Audience:  Anyone interested in learning efficient ways to produce print and digital publication type documents. Publisher and Word have their uses but InDesign is the application of choice for many professionals who create flyers, booklets, and manuals.

Session Objective:  Learn the basics of Adobe InDesign in this hands-on session. By the end of this class you will understand how to create & design posters, flyers, brochures, magazines, newspapers, manuals and books etc. Students will even learn how to create an EPUB with InDesign.

Maximizing Outlook for Windows with Mike Gifford
10:00- 11:30, Nov 14

Target Audience:  Participants must know the basics of Outlook 2016 but want to know more than just frequently used Mail and Calendar features.

Session Objective:  Participants will be introduced to features such as Quick Steps, delayed send, unsend, delivery receipt, direct reply, capturing screen shot, voting, sending and accepting meeting invitations and using the Outlook calendar.

Photoshop Essentials with Michael Vick
1:00 – 2:30, Nov 7

Target Audience: Persons with no experience in using Photoshop and are considering this application for basic graphic editing will benefit from this session. Web and/or digital sign content managers should consider use of Photoshop to enhance the images on the website and digital signs.

Session objective:  Participants will gain experience in using the Photoshop toolbox and basic functions within the application to perform limited editing tasks for graphic images.

WCM/SharePoint “Up and Running” with Jean Childress
10:00-11:00, Nov 8

Target Audience:  A new web platform is entering a phased rollout starting in December 2017, but parts of campus will be using SharePoint for through 2018. Persons who maintain departmental web sites are required to attend training on the platform used by your departmental. This session will focus on the skills needed to edit existing content as well as create new pages.

Session Objective:  Participants will leave the session with experience in uploading files, insert images, linking urls. Participants will take a peak from the backstage view to learn how to restore a previous version of a page, delete pages and reorder the navigation menu.
Lynda.com is a first-rate online video training resource, and ITS has limited licenses available for check out. Lynda course selections number in the thousands and topics include Office apps, Moodle, Adobe CC, Camtasia, and so much more. Email Jean Childress for more information on availability.

ITS on-demand courses are usually one to two hour sessions, which are scheduled upon request. If you would like to find a convenient time or need more information about course content, email Jean Childress.

25Live - Room Reservations with Bryan Zollman

Target Audience: Persons charged with reserving rooms for meetings and events who want a short overview of our campus resource scheduling software will benefit from this class.

Session Objective: Learn to enter an event, use the wizard and approve reservations as needed. Class will wrap up in 45 minutes leaving time for Q&A

Acrobat - Getting the Most from Acrobat Professional with Susan Dunnavant

Target Audience: Persons who have access to Acrobat Professional and who want to do more than simply Print to PDF.

Session Objective: Participants will learn how to perform basic editing within a PDF document. Bookmarks, links, sticky notes, comments, and adding, removing and rearranging pages will be covered – along with setting appropriate initial views and security for pdf documents.

Anatomy of a Teaching Station with Joe Hiltabidel

Target audience: Anyone using a teaching station will benefit from this overview, but it is especially targeted to new faculty and faculty using newly upgraded teaching spaces.

Session objective: Learn proficiency with the classroom technology. Joe will give an overview of the teaching station components including cautions and tips on how best to avoid problems.

Camtasia Essentials with Susan Dunnavant

Target Audience: Faculty and staff interested in honing skills in video creation technology for lecture capture and content development. Administrators and advisors, with an audience who will benefit from video tutorials, will find Camtasia an accessible tool for creating high quality videos.

Session Objective: Participants are introduced to this powerful screen recording and video editing software. Camtasia is used in many environments to enhance communication by creating visual demos that are easy to create and share. In this session, Participants will create and produce a basic video clip, using test, images and audio.

Confluence Wiki

Target Audience: Those interested in exploring an efficient on-line collaboration tool will find Confluence of particular interest. Give your team one place to share, find, and collaborate on information they need to get work done.

Session Objective: Participants will learn how to navigate Confluence, use HTML editor and be provided with suggestions for using wikis in the collaborative process.
Dreamweaver: Fundamental Web Editing Concepts with Susan Dunnavant

Target Audience:  Dreamweaver is a powerful tool when managing or editing sites in SharePoint and eweb. SharePoint web administrators or those with eweb-hosted sites will benefit from this feature rich and user-friendly application.

Session Objective: Participants will learn the basics of creating and publishing a website. Some web editing experience is helpful but not required.

Excel Charts with Susan Dunnavant

Target Audience: Persons already familiar with the basic use of Excel who want to improve skills in creating charts and visual illustrations to interpret worksheet data.

Session Objective: Using sample data, participants will differentiate between the various chart and illustration resources offered natively within Excel. Participants will gain experience in choosing chart types and themes to best illustrate trends and analyses. Using Excel charts within Word documents and PowerPoint presentations will also be practiced.

Excel Managing Lists with Susan Dunnavant

Target Audience: Persons already familiar with the basic use of Excel who manage sizable or unwieldy lists of information and would like to do so more efficiently.

Session Objective: Participants will gain hands-on practice with filtering arranging, illustrating and analyzing simple and complex lists. Subtotals, lookups, conditional operations, forecasting and pivot tables will be practiced.

Excel VLookup with Susan Dunnavant

Target Audience: Participants experienced using Excel.

Session Objective: Learn to use VLOOKUP to look up a value you want to find in an Excel list or table. VLOOKUP looks at a value in one column, and finds its corresponding value on the same row in another column. This session will include hands-on training.

Excel: Summarize Using Pivot Tables with Susan Dunnavant

Target Audience: Participants should have Excel experience.

How many of a list of addresses are in South Carolina? How many invoices are overdue? What’s the average of...? If you are an Excel user with datasets to summarize you should not be without Pivot Tables in your office productivity toolbox. Prior experience with Excel is required for participants to benefit from this session.

Exploring Apple TV with Wade Shepherd

Apple TV is currently installed in most classrooms on campus. Bring your mobile devices for this hands-on session.

Target Audience: Faculty interested in learning more about how Apple TV can enhance use of multimedia in classrooms will find this session of interest.

Session Objective: Through demonstration and hands on experimentation, participants will have the opportunity to practice new ways of delivering multimedia using this recent teaching station addition.

Forms with Susan Dunnavant and Jason Long

Target Audience: If you are interested in exploring various form tools available on campus, and have solid skills in either Windows or Mac OS and have some familiarity with Microsoft Excel you will benefit from this class.
Session Objective: In this 90-minute hands-on seminar, participants walk through the creation, distribution and collection of forms using Qualtrics, MachForm, and Adobe Acrobat Professional.

**Gathering Insight with Survey Tools: Qualtrics Research Suite at Furman with Susan Dunnavant**
Target Audience: Faculty and staff who are planning a survey.

Session Objective: Qualtrics -- an industry leading survey tool is licensed for use at Furman. Practice using this online research suite and gain an understanding of the types of questions, survey strategies and reporting that will offer meaningful, appropriate inferences from your survey data.

**GarageBand with Michael Vick**
Target Audience: Beginner to intermediate musicians interested in learning to play an instrument, write music, or record a song. GarageBand has everything you need.

Session Objective: Participants will be introduced to the various components of GarageBand, which will allow them to navigate the software for learning or producing

**Mac Secrets with Wade Shepherd**
Target Audience: Good candidates for this class are individuals who are new to Macintosh computers or are thinking about switching from a PC.

Session Objective: A hands-on session will include a look at computer hardware and software. Topics include:
Using Your Apple ID - iCloud, App Store, Syncing, FaceTime, Using iPhoto for Organizing, Editing, Sharing Pictures, and Time Machine for file management, disk utility and how to restore your computer.

**Machform Creation and Administration with Jason Long**
Target Audience: Machform offers a simple yet powerful platform for web form creation. Learn how to administer forms and maximize use of online forms. Participants should have access to Machform account.

Session Objective: Participants will create a form, and look at options for managing the data

**Moodle: Barely Beyond the Basics**
Target Audience: Faculty and staff that have limited facility with Moodle, and want to refresh and extend skill level will enjoy this class. Use Moodle for more than a document repository by stepping just beyond the basics and learn how to spruce up the look of your site and incorporate quizzing. Corey will also spotlight the newest Moodle features.

Session Objectives: Understanding basic features of Moodle, including course setup, use of forums, posting of course materials and quizzes, as well as best practices for backing up your course. A time for hands-on exercises with your current Moodle courses will be provided.

**Moodle: Learn Lessons**
Target Audience: Faculty interested in using an additional Moodle resource called Lesson, which allows content to be displayed/accessed sequentially should consider this course.

Session Objective: Practice using Lesson to create conditional activities and associate quizzes with the Lesson content.

**Moodle: Use Workshop for Peer Assessment**
Target Audience: Faculty interested in using Moodle more fully will find workshop a good consideration when in need of peer assessment tool.
Session Objective: Students submit their work via an online text tool and attachments. There are two grades for a student: their own work and their peer assessments of other students’ work. In this session, you will participate in a hands-on demonstration of how to review and submit assessments.

**Outlook Calendar with Mike Gifford**

Target Audience: Users who are not using the calendar or want to become familiar with more than just the basic calendar tools are good candidates for this class.

Session Objective: Participants will see calendar tools demonstrated and explained – and there will be a time for practice. Bring your mobile devices too if you want to get all synced up!

**Protecting Personal Information with Susan Dunnavant**

Common sources of information that can lead to identity theft will be covered along with legal and policy protections of data you handle at Furman: what is FERPA, HIPAA, what a hacker can learn about you from your computer, safe practices for telephone, email, and document handling and what to do if you think your identity may have been compromised.

You will also find answers to your questions about:

- How crooks get credit card numbers
- How social media can invite crimes
- Typical scams
- Reported data breaches - how they happened and what they cost
- How South Carolina and Greenville compare with other communities

Participants in this 75 minute seminar will receive a license for one year of Crash Plan Pro cloud backup for your Furman computer. Contact Jean Childress if you would like to schedule a session on this topic for your workgroup.

**PowerPoint Reinvented with Susan Dunnavant**

Target Audience – Faculty and staff interested in using PowerPoint to create presentations appropriate for objectives and the intended audience.

Session Objective: Participants will practice using views, themes and template elements to maximize efficiency of development and editing. The session will include hands-on practice with various templates, interactive features and add-ons for creating presentations and eLearning modules.

**Storytelling by the numbers - Give your Data a Visual Voice with Susan Dunnavant**

In this 3-part hands-on series, participants will learn how to create and when to use a variety of Excel standard charts, advanced visuals and “not Excel” data visualizations. Attend all three sessions or choose only the one(s) of particular interest to you. Reserve a seat by emailing Jean Childress.

Basic Charts
Using Excel and PowerPoint, we will select, create and edit/format charts and graphics to best illustrate various sample datasets. Representative charts include bar, column, pie, histogram, donut, line and area. We will also practice with customizing number formats, charts axes, legends and colors. Learn how to remove the distractions and focus attention on the story your data is telling.

Intermediate/Advanced Visuals
In this session, we will expand on the basic set of graphics in Microsoft Office to create intermediate/advanced visuals that require personalization. We will use sample data to create and modify a lollipop chart, slopegraph, heat map, Pareto chart, box and whiskers chart, and an interactive dashboard using slicers in Excel.
“Not Excel” data visualizations
In this session we will move beyond traditional methods and tools to consider and practice with visualizations such as word clouds, maps, icon arrays, Sankey diagrams

Twitter with Brittany Hildreth
Target Audience: Those new to or unfamiliar with Twitter, the 280-character social media platform, will benefit most from this class.
Session Objective: Participants will be introduced to the basics of Twitter, including possible functions in personal and professional life.

Where Do I Put It and How Do I Share It
Targeted Audience: Those new to Furman and others interested in choosing the resources for your particular need.
Session Objective: Learn the best-case uses for Box and OneDrive and how to upload and share files link to files from Moodle and grant appropriate permission on the various platforms. Other web resources such as Confluence wiki, eWeb, WordPress will be discussed too.

Workday Training Link
